Coforge Expands Kraków Engineering Center as Strategic AI Engineering and Nearshore Delivery Hub

Strategic multi-client center serves as a key pillar of Coforge's global delivery network

Princeton, NJ, USA | Greater Noida, India | October 1, 2026 – Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced the continued expansion of its Kraków, Poland engineering center, which has rapidly become a strategic AI engineering and nearshore delivery hub serving clients across Europe and globally.

Since opening in 2025, the center has grown from supporting a single anchor engagement to a multi-client, multi-practice delivering AI-first engineering, cloud, and modernization services for global clients. The facility now employs more than 375 engineers and is expected to grow to more than 660 professionals by 2027, reflecting strong client demand and Coforge's continued investment in AI-enabled engineering and delivery.

"Europe is an important growth market for Coforge, and our continued investment in Kraków reflects our long-term commitment to serving clients across the region," said **John Speight, President & EU Geo Business Leader, Coforge**. "This expansion underscores our confidence in and commitment to local talent, and our focus on helping European enterprises accelerate their AI, modernization, and digital transformation initiatives."

Located in one of Europe's leading technology hubs, Kraków offers a combination of engineering depth, scalability, and nearshore proximity. The location provides access to a strong pipeline of engineering graduates and technology professionals while enabling close collaboration with clients across European and UK time zones.

"The rapid scale-up of our Kraków center reflects two major market shifts: growing demand for AI-enabled engineering and the need for delivery models that combine proximity, specialized talent, and speed," said **Sunil Fernandes, Chief Operating Officer of Coforge**. "Our Kraków Engineering Center has quickly become an important growth engine for Coforge and our clients, with hybrid human and agent Mod Squads accelerating innovation and delivering measurable business outcomes for enterprises in Europe and beyond."

The center serves a growing portfolio of clients across sectors including travel, banking, logistics, retail, and enterprise services. Coforge has recently expanded the Kraków center with more than 20,000 square feet of new workspace and scalable infrastructure to accommodate increasing client demand and workforce growth.

About Coforge:

Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our

solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes – lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
