JBM Auto continues to Lead India's Electric Bus Market with 33% Share in September 2026

- Registers 274 electric buses in September 2026, the highest in the country, as per Vahan data
- Registers 892 electric buses in H1FY26-27, with a market share of ~24% in April-Sept 2026 period

New Delhi, October 01, 2026: JBM Auto Limited (BSE: 532605 | NSE: JBMA), the leading Indian automotive and electric mobility company, has strengthened its leadership in the country's electric bus market, registering the highest number of electric buses in September 2026 with 274 registrations and commanding a 33% market share, according to data from the Vahan portal.

The company also maintained its market leadership during H1FY26-27, registering 892 electric buses between April and September 2026, translating into a market share of approximately 24%. During the same period, the Indian electric bus market recorded 3,771 registrations.

JBM Auto's sustained leadership follows its strong performance in FY26, when the company recorded the highest electric bus registrations in the country. The continued momentum underscores the strength of JBM's integrated electric mobility ecosystem, execution capabilities and growing adoption of its electric bus solutions across public and institutional transport.

Speaking on the milestone, **Mr. Nishant Arya, Vice Chairman & MD, JBM Auto**, said, " Our continued leadership in India's electric bus market is a true reflection of the scale, depth and execution strength of the ecosystem we have built over the years. Our purpose-built born EV solutions offer innovation, efficiency, safety and a passenger first approach. Aligned to our Net Zero 2040 commitment, our vision is to make every day travel cleaner, smarter and more accessible for people across the country."

JBM Auto operates the world's largest dedicated integrated electric bus manufacturing facility outside China, located in the NCR region, with an annual manufacturing capacity of 20,000 buses. The facility integrates design, engineering, testing, validation and manufacturing capabilities, enabling JBM to develop and deploy electric mobility solutions at scale.

JBM electric buses have, to date, covered over 450 million e-kilometres, serving over 2 billion passengers and contributed to avoid over 1 billion kilograms of CO2 emissions. These milestones reflect the company's growing contribution to India's transition towards zero-emission public transportation and its vision of enabling cleaner mobility.
