For immediate release

KPI Green Energy Signs Binding Offer to Acquire 507.9 MW of Operational Wind Capacity in Gujarat

KPI Green Energy Limited today announced that it has signed a binding offer to acquire **100% of the equity of Alfancar Energy Private Limited (AEPL) and Netra Wind Private Limited (NWPL)**, at an enterprise value of approximately **₹2,410 crore**. Together, the two companies own **507.9 MW of operational wind projects** at Bhuj, in Gujarat's Kutch wind corridor.

The transaction marks a significant step-up in KPI Green's wind presence. Upon completion, it will bring fully operational, revenue-generating assets with long-term contracted revenues onto the company's balance sheet, adding scale immediately without construction or commissioning risk.

Transaction highlights

- **Scale:** 507.9 MW of operational wind capacity – **301.4 MW** held by AEPL and **206.5 MW** by NWPL – located in the Kutch wind corridor at Bhuj.
- **Contracted revenue:** Both portfolios sell power to **Solar Energy Corporation of India (SECI)**, a Government of India enterprise, under 25-year power purchase agreements. With AEPL commissioned in March 2021 and NWPL in March 2024, the combined portfolio has approximately **21 years of remaining contracted life** on a capacity-weighted basis.
- **On completion,** KPI Green's installed IPP capacity will increase from **1.16 GW to approximately 1.67 GW**, with the addition of **507.9 MW of operational wind capacity**, positioning the company **to cross 2 GW of installed IPP capacity by the end of the year**

Completion is subject to the execution of definitive transaction documents and the satisfaction or waiver of customary conditions precedent, including lender, contractual and regulatory approvals. **The transaction is expected to close by 28 February 2027.**

Commenting on the development, Dr. Faruk Patel, Chairman & Managing Director, said: *"This is a defining moment for KPI Green. It will be our first acquisition at this scale and our first in wind, and upon completion bringing 507.9 MW of operational, SECI-contracted capacity onto our platform from day one. The acquisition strengthens our presence in Gujarat's Kutch wind corridor and upon completion, adds a portfolio of revenue-generating assets with long-term contracted cash flows. As we continue to build our own portfolio as a long-term developer and independent power producer, this transaction marks an important milestone in our growth journey."*
