#### Detailed Rationale

Crisil Ratings has downgraded its rating on the long term bank facilities Valiant Laboratories Ltd (VLL) to '**Crisil BBB/Negative**' from '**Crisil BBB+/Negative**'.

Rating action reflects continued moderation in the business risk profile of the company on account of subdued demand and fall in realization along with lower fixed cost absorption.

Revenue for the 9MFY25 moderated to around Rs 75.60 crore, a year-on-year degrowth of ~50% mainly due to slower-than-expected recovery over the medium term. Performance in 9MFY25 remained under pressure owing to subdued demand. Company has reported revenue of Rs 75.60 crore and operating loss of Rs 8.51 crore in 9M FY25 where in revenue was at Rs.151.48 Crores and operating loss of Rs.3.88 Crores during similar period of FY 24. This plummeting margin is also on account of low-capacity utilization resulting in lower absorption of fixed cost amid tepid demand from the end user segment. The company's working capital cycle has also been stretched.

Though company's performance has seen improvement in Q3FY25 (Revenue of Rs.35.23 Crores and operating profit of Rs.0.62 Crores), sustenance of similar performance over medium term will remain key monitorable.

Despite the weakened operating performance, financial risk profile is likely to remain adequate with the expected benefits from operationalization of the proposed capex. Debt protection metrics, which is expected to be impacted this fiscal, will gradually improve from next fiscal and will remain monitorable. Despite expected additional debt of Rs 60-80 crore for capex in the fiscal 2025, company's gearing is expected to remain below unity.

Liquidity will be supported by moderate bank limit utilization and unencumbered cash and cash equivalents of Rs 79 crore as on Dec 31st, 2024. Company has Rs.10-15 Crores repayment obligation in FY25. Repayments are expected to be at Rs. 15 crore per annum starting FY26.

The ratings continue to reflect the strong market position marked by established customer relationship and diversified product basket, experienced management, and healthy capital structure. These strengths are partially offset by its susceptibility to fluctuations in raw material prices, intense competition and regulatory risks, and its working capital-intensive operations.

#### Analytical Approach

To arrive at the ratings on VLL, Crisil Ratings has combined the business and financial risk profiles of VLL and its subsidiary Valiant Advanced Sciences Pvt Limited (VASPL).

Unsecured loan of Rs 59.4 crore from the promoters has been treated as debt

*Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation.*

#### Key Rating Drivers & Detailed Description

##### Strengths:

- **Well Established clientele base and Experienced management:** Promoters have been engaged in the chemical intermediates business for over three decades which has enabled them to develop strong understanding of market dynamics and establish healthy relations with customers and suppliers. VLL has established presence in the active pharmaceutical ingredient (API) manufacturing business. Presently company manufactures paracetamol. VLL has established healthy and long-term relationship with various customers across India. Crisil Ratings believes that VLL's established industry presence, diversified product basket and long and established relations with customers, bolsters its business risk profile
- **Healthy capital structure:** The financial risk profile is above average with Low reliance on external funds has kept the capital structure healthy, as indicated by gearing of 0.32 time (which is largely on account of unsecured loans of Rs.59.4 Crores) and total outside liabilities to adjusted net worth ratio of 0.45 times as on March 31, 2024, coupled with strong net worth of Rs. 236.8 crores. Company has raised Rs. 152.46 crores through initial public offering (IPO) in October 2023, thereby resulting in further improvement in capital structure. Company is undertaking capex and IPO proceed is expected to partly mitigate the funding risk of capex being undertaken.

While debt protection metrics have also been healthy backed by low debt with interest coverage and net cash accrual to total debt ratio stood at 16.37 times and 0.03 time, respectively, for fiscal 2024, it will moderate in FY25.

#### **Weaknesses:**

- **Susceptibility of operating margin to volatility in raw material prices:** The raw material prices are volatile, and their availability is subject to market conditions. The operating margin of VLL has been volatile in range of 0.6%-26% over past five fiscals, on account of fluctuations in raw material prices, which the company can pass on after a lag. Players in the pharmaceutical industry are susceptible to regulatory changes with respect to price controls and approvals. Moreover, intense competition in the pharmaceutical industry further restricts bargaining power. Furthermore, sustenance of operating margin post completion of capex and during ramp up stage will remain monitorable.
- **Working capital-intensive operations:** Gross current assets were at 124-250 days over the four fiscal periods through 2024. The large working capital requirement stems from sizeable receivables of 91 days and moderate inventory of 19 days. The receivables are high at the end of the fiscal due to high year-end sales and they provide extensive credit to longstanding customers. The working capital cycle will remain a key monitorable

#### **Liquidity: Adequate**

Bank limit utilization is 34 for the past nine months ended Dec 2024. Current ratio is satisfactory at 6.95 times on March 31, 2024. Moderate cash and cash equivalents of around Rs. 78.23 Crores as on December 31, 2024. Low gearing and moderate net worth support its financial flexibility and provides the financial cushion available in case of any adverse conditions or downturn in the business.

#### **Outlook: Negative**

VLL's credit profile will remain under pressure on account of subdued operating performance with fall in operating margin

#### **Rating sensitivity factors**

##### **Upward factors:**

- Sustained revenue growth and operating margin improving above 5%, leading to higher cash accrual
- Completion of the on-going capex
- Improvement in the financial risk profile particularly debt protection metrics.

##### **Downward factors:**

- Operating profitability remaining below 3% leading to lower net cash accrual
- Significant delays in completion and ramp up of revenue from the enhanced capacities
- Large debt-funded capital expenditure or increase in working capital requirement weakening the capital structure

#### **About the Company**

The company is engaged in manufacturing of active pharmaceutical ingredients (API) such as paracetamol and has manufacturing facility located in Tarapur- Maharashtra). Currently, the operations are being managed by Mr. Santosh Vora (Son of Mr. Shantilal Vora ) who is the director in the company. The company has also formed subsidiary Valiant Sciences Pvt Limited. **About Crisil Ratings Limited (A subsidiary of Crisil Limited, an S&P Global Company)**

Crisil Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

Crisil Ratings Limited ('Crisil Ratings') is a wholly-owned subsidiary of Crisil Limited ('Crisil'). Crisil Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").

Crisil Ratings uses the prefix 'PP-MLD' for the ratings of principal-protected market-linked debentures (PPMLD) with effect from November 1, 2011, to comply with the SEBI circular, "Guidelines for Issue and Listing of Structured Products/Market Linked Debentures". The revision in rating symbols for PPMLDs should not be construed as a change in the rating of the subject instrument. For details on Crisil Ratings' use of 'PP-MLD' please refer to the notes to Rating scale for Debt Instruments and Structured Finance Instruments at the following link: <https://www.crisilratings.com/en/home/our-business/ratings/credit-ratings-scale.html>
