Sub: Intimation under Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Earnings Presentation

Dear Sir,

In terms of Regulation 30 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find attached herewith Earnings Presentation pertaining to Financial Results of the Company for the quarter ended June 30, 2026.

The aforesaid presentation will also be made available on the website of the Company at www.mamata.com.

Thanking you.

Yours faithfully.

For, Mamata Machinery Limited

Management Commentary

Revenue from Operations for Q1FY27 declined 6% YOY, on account of slower execution as customers deferred machine deliveries, reflecting the continued effects of the polymer price escalation triggered by the West Asia crisis. Order intake & business visibility has remained healthy during the quarter, in line with our business outlook for FY27, and as reflected in our order backlog at the end of FY26. However, the sudden and significant rise in polymer prices has increased working capital requirements for our customers, particularly the converter category, leading them to divert capital from CAPEX projects towards the more urgent needs of immediate working capital. As a result, customers are requesting us to push back deliveries, making revenue booking and dispatches challenging in the near term. We expect execution to pick up in the latter part of the year as some of these pressures subside.

On the profitability front, gross margins remained healthy, registering an increase on both YoY and QoQ basis, signalling a healthy mix and underlying profitability. On the OPEX front, Other Expenses were higher due to exhibitions and trade shows during the quarter, including our presence at Interpack 2026 in Düsseldorf in May. Employee Benefit Expenses also registered some increase. These costs weighed on our EBITDA during the quarter, which should normalise, mainly as exhibition and trade show expenses normalise as a percentage of the top line over the rest of the year.

On the operational front, a key recent development was our recyclable film technology RecTech™ receiving 100% Recyclability Certification in the European Union in August, further establishing the case for the commercial viability of this technology. We now await the certification from the Association of Plastic Recyclers (APR), USA.

Looking ahead, we are cautiously optimistic about our business outlook for FY27. While some headwinds from the previous year, such as tariffs, have subsided, newer ones have emerged in the form of the West Asia crisis. We are navigating these strategically, ensuring business growth while maintaining a robust balance sheet position.

07

Company Overview

Executive Summary

Unique value proposition

Total flexible packaging machinery solutions provider with presence across value chain: *co-extrusion > converting > packaging*

IP-driven business

Intellectual, R&D, and engineering prowess resulting in industry-first product introductions & innovations

Highly capital-efficient business model

IP generation, asset-light manufacturing, robust value propositions leading to healthy margins & capital return ratios

Market leadership

India's leading converting machinery player and amongst top 5 globally. Leading domestic player in Packaging machinery as well

Generating healthy cash flows

Minimal capital requirements to grow, lean balance sheet, and healthy cash-reserves

Championing 'Make in India, for the World'

Focus on import substitution, while effectively competing in sophisticated export markets: *US, EU, Middle-East & Africa*

At forefront of recyclable technology

Developed specialised technology compatible with recyclable films, without compromising on quality & speed

Industry tailwinds

Rising consumption, e-commerce growth, growing packaged foods, rigid to flexible packaging shift, and growing export potential

Mamata At a Glance

Unique Value Proposition: Total Flexible Packaging Solutions

Unique value proposition with **sustainable flexible packaging** solution under one-roof

One-stop solution provider for brand owners & convertors alike

Unique understanding of all key technologies in flexible packaging solutions: polymer processing; plastic rheology; converting, filling, and sealing systems

Evolution:

Becoming a Globally Recognized Packaging Machinery Brand

Intellectual and R&D Driven Leadership

Talent & Tools

- 91 engineers & application experts at Mamata with avg. 15 years of experience
- R&D-centric, engineering-focused organisation
- Attracting & retaining good talent across multiple domains
- Employing cutting-edge 3D designing tools: Inventor & AutoCAD
- DSIR recognised in-house R&D centre
- In-house electronics lab

Dedicated talent

Design & Ideations – 17

Software & Coding – 3

Capabilities & Expertise

- Design & Ideation
- Software & Coding
- Hardware & Electronics
- Assembly & Integration
- Testing
- Industry 4.0
- Plastic Rheology
- Product Filling Technology
- Sealing Technology

Only Indian flexible packaging machinery player with dedicated in-house software & coding

In-house coding & electronics lab significantly reduces hardware-software inertia

Innovation Leadership

Track record of industry-first product introduction & innovations:

- India 1st microprocessor-controlled bag making machine
- World's fastest non-woven bag and back seam maker
- Ultra-fast VFFS machine with 200 cycles
- World's 1st HFSS Simplex machine with 120+ cycles
- Launched Vega 500 SF at K 2026: Solution for processing mono material films at high speed & accuracy

Proven track record of multiple successful product launches since inception, tailored to target applications and markets

Robust & continuous pipeline of new solutions

5

National & International Patents Received

Quality-First Approach

Our “Quality-First” approach is embedded in every stage – from design and component selection to in-house testing and global certification – delivering unmatched reliability, low ownership costs, and industry-leading warranty coverage

7

Quality Assurance Team

26

Service Engineers

Warranty Cost
Consistently <0.5% of Sales
(₹ IN MILLIONS & % OF STANDALONE SALES)

Quality Begins with Design

Each solution engineered with quality as the foundation

Deploying robust design methodologies to ensure reliability & performance from the outset

1

In-House Comprehensive Testing

All machines undergo rigorous in-house testing

Identifying & resolving issues before delivery

Comprehensive component-level testing for all inputs (not just on sampling basis)

2

Low Cost of Ownership

Built for durability, efficiency and versatility

Ranks very high on price-performance parameters

Minimum after-sales service needs & low cost of ownership

3

Industry-Leading Warranty

Only Indian player to offer an 18-month comprehensive warranty

Industry standard is 9-month electricals & 12-month mechanical warranty

4

Low Warranty Cost

Despite comprehensive warranty, cost of warranty is consistently <0.5% of top line

Reliability & peace of mind for customers

5

Global Certifications

All products are certified to ISO 9001:2015

Safety certification (CE, CSA) available on customer needs

6

State-of-Art Infrastructure

India

State-of-art manufacturing facility & corporate HQ in Ahmedabad

Salient Features

Capacity to make 250+ machines annually

Potential to expand further within existing facility, as and when needed

Land – 20,662 sqm.

Built-up Area – 9,235 sqm.

Surrounded by an extensive vendor ecosystem in its proximity

DSIR, GOI recognised in-house R&D Centre

Dedicated in-house electrical & electronic lab

Modern testing infrastructure

Operating Working Capital = Inventory + Receivable – Payables – Advances from Customers

Potential for Operating Leverage

Common-Size P&L Statement

Consistently high contribution margins (4Y Avg. GPM if 57%)

Potential for rationalisation of Employee Benefit & OPEX on a higher revenue base

Potential to grow from existing facility without incurring significant CAPEX

Inherent Business Seasonality

ANNUAL REVENUE SPLIT – H1 vs. H2

Delivery of machinery solutions is inherently seasonal & lumpy

Seasonality of business, skewed towards H2, in both domestic & exports:

- Domestic – Skew on account of financial year-end deadlines to complete CAPEX projects
- Exports – Typically order intake picks up during August-September and thus, deliveries are scheduled in H2 of Indian FY

4Y Average 65% of annual top line booked in second-half of the year
