Plot No. C/1, G Block, Bandra Kurla Complex,
Bandra, Mumbai – 400 051
NSE Symbol – COFORGE

Dear Sir/Madam,

Subject: Press Release

Pursuant to applicable provisions of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, as amended, ("SEBI Listing Regulations") please find enclosed press release of the Company announcing that **"Coforge Introduces Autonomous Software Factory for the Era of Agentic Software Development."**

We request you to take the above on record.

For Coforge Limited

BARKHA SHARMA Digitally signed by BARKHA SHARMA Date: 2026.10.29 09:01:54 +05'30'

Barkha Sharma
Company Secretary & Compliance Officer

Encl.: As above

Coforge Introduces Autonomous Software Factory for the Era of Agentic Software Development

Leading AI engineering firm says the future of software engineering is agent orchestration, not code generation

Princeton, NJ, USA | Greater Noida, India | October 29, 2026 – Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced its Autonomous Software Factory (ASF), a new operating model for managing AI agents across the software development lifecycle (SDLC).

As enterprises move beyond developer copilots and AI experimentation, generating code is no longer the primary challenge. The challenge is governing and coordinating AI agents at enterprise scale. ASF provides a structured operating model for agent orchestration, execution, governance, and human oversight.

"Enterprise software development is entering a post-coding era, where generating software is quickly becoming the easy part," said **Vic Gupta, Executive Vice President, Coforge.** "The real source of competitive advantage will be how effectively organizations coordinate, govern, and scale AI agents across the software lifecycle. Autonomous Software Factories provide the blueprint for making AI-native software delivery operational at enterprise scale."

ASF reflects Coforge's broader vision for operationalizing enterprise autonomy, where intelligent systems increasingly execute operational work while humans focus on architecture, governance, strategic decision-making, and business outcomes.

Within secure execution environments, ASF enables specialized AI agents to continuously execute coding, testing, validation, code review, and quality assurance in parallel, enabling a scalable and repeatable model for AI-native software engineering.

As AI-generated artifacts become foundational, enterprises must redesign engineering processes, governance models, and quality controls. ASF establishes the operational backbone for AI-native engineering enabling delivery acceleration while maintaining trusted, enterprise-grade controls, compliance, and outcomes.

About Coforge
Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes—lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
