FIBERWEB (INDIA) LTD

Company Overview

Fiberweb @Glance

Fiberweb (India) Ltd. (Fiberweb, The company) established in 1985, though it started as a plastics company it ventured into garbage and carrier bags, and gradually ventured into spun bond nonwoven fabrics, first of its kind in India.

Since commissioning of its plant in 1996, it has been 100% EOU, exporting to countries like UAE, South Africa, Australia, USA, UK & Europe.

The company also has in-house facility for manufacturing stitched garments like medical & Industrial gowns and overhauls, Aprons, Car Covers and Other Made-ups as per clients specifications.

It has also set-up a new product line of melt blown Nonwoven fabrics used in personal hygiene products like diapers, Face Masks etc.

The company is exploring new opportunities & product segments for growth.

FIBERWEB (INDIA) LTD

Key Facts

36+
Year of Experience

100%
Export Oriented Unit

~ 5,000
MTPA installed capacity of Spun Bond

75%
Products Exported to USA, UK, Europe, Australia, New Zealand, South Africa and Gulf

~ 3,000
MTPA Melt blown

Certified
ISO 9001:2015
ISO 14001:2015
ISO 45001:2018

85,000 Sq.ft.
manufacturing plant

Q2 FY27
Revenue – ₹30.74 Cr
EBITDA – ₹ 3.31 Cr
Net Profit – ₹ 1.27 Cr

BBB- Stable
Credit Rating

A Timeline Of Fiberweb

1986 - 1995
Established as a plastic moulding company

1995 - 2009
Started exports to North America, Subsequently started exporting to UAE, Europe, UK, South Africa, New Zealand & Australia

2016
Came out of BIFR 2500 MTPA of leased spun bond capacity signed up

2017
Became Zero Debt company with positive net worth

2019
Successfully commissioned Melt blown line with a 1500 MTPA capacity Capex incurred – ₹ 45 Cr.

2021
Successfully doubled capacity of Melt Blown to 3000 MTPA with capex of ₹ 10 Cr

2022
Shares got listed on National Stock Exchange

2023
Received export order worth of ₹ 10 Cr covering PP Spun Bond and Melt Blown Fabrics

2024
The company holds ratings of IND BBB-/Stable for fund-based facilities and IND A3 for non-fund-based facilities.

State Of The Art Manufacturing Facility

Fiberweb India Ltd. has its manufacturing plant situated in Daman. Spread across an area of 85,000 sq.ft.

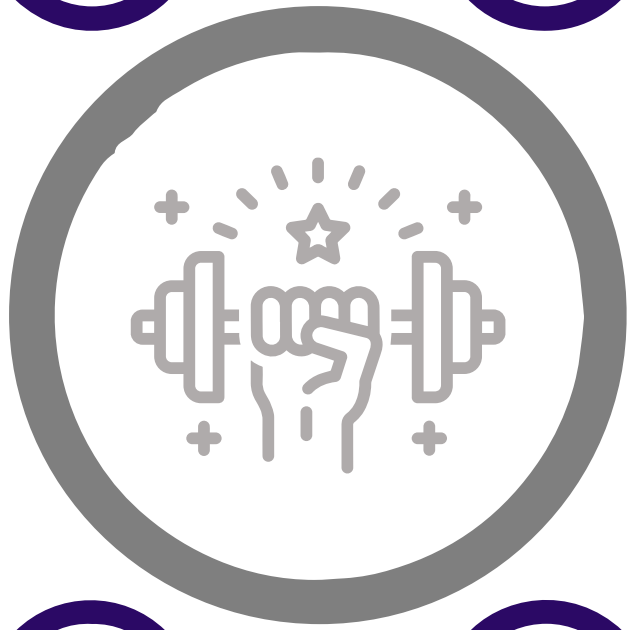

With one of the most modernised plant & Equipment.

Spun Bond – **5,000 MTPA**	**Capacity**	Melt blown – **3,000 MTPA**

The company has started re-investing in modernization and de-bottlenecking.

Key Strengths

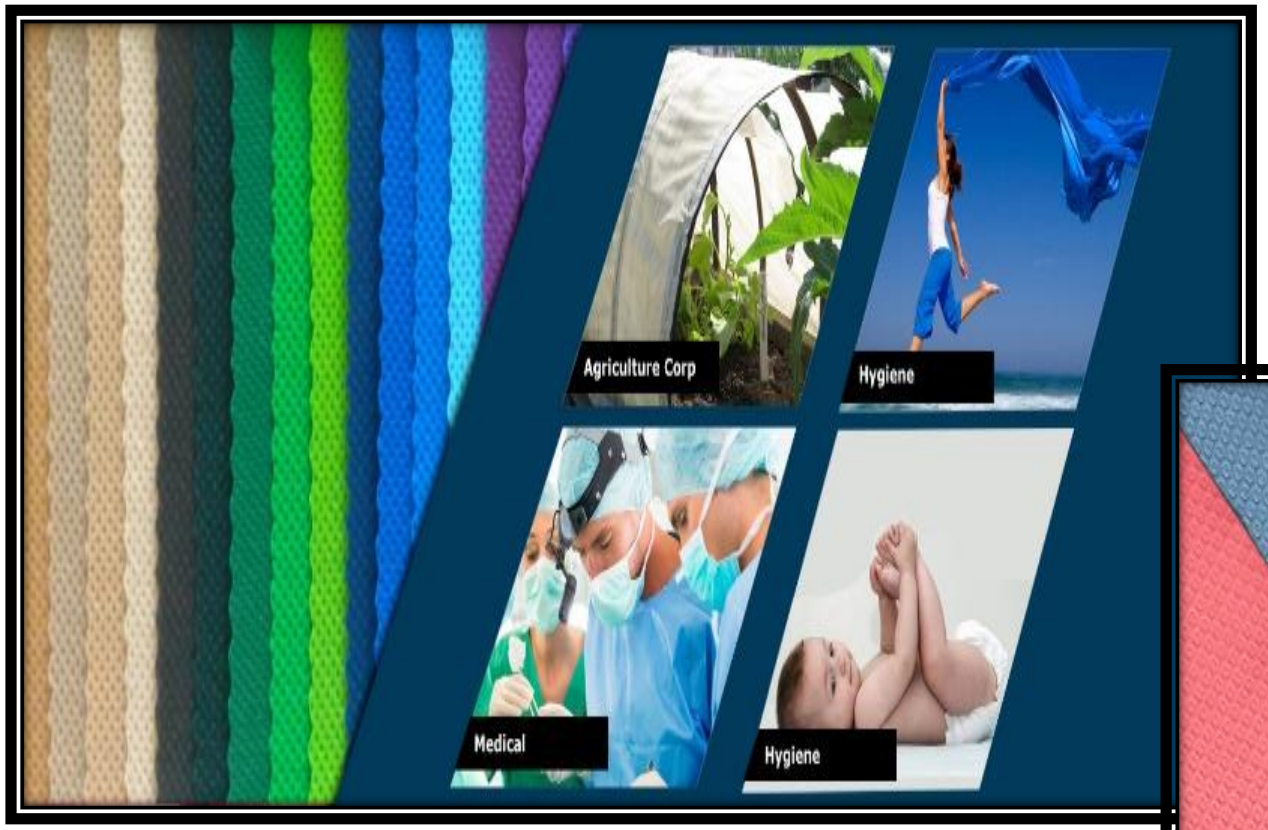

1. Pioneer and amongst leading players in manufacturing of Spun bond nonwoven fabric in India
2. 100% EOU, with ~75% of its products exported to US, Europe, UK etc.
3. Well set supply chain, with most of the raw material sourced from the world's largest O&G company, Exxon Mobil
4. Product innovation & cost competitiveness.
5. Best in class product quality with International accreditations and certifications - ISO 9001-2008, 14001-2004, OHSAS 18001:2007, Intertek and UKAS
6. State-of-art manufacturing facility at Daman, with machines procured from Eisenhauer GMBH of Germany

FIBERWEB (INDIA) LTD

Business Overview

Product Categories

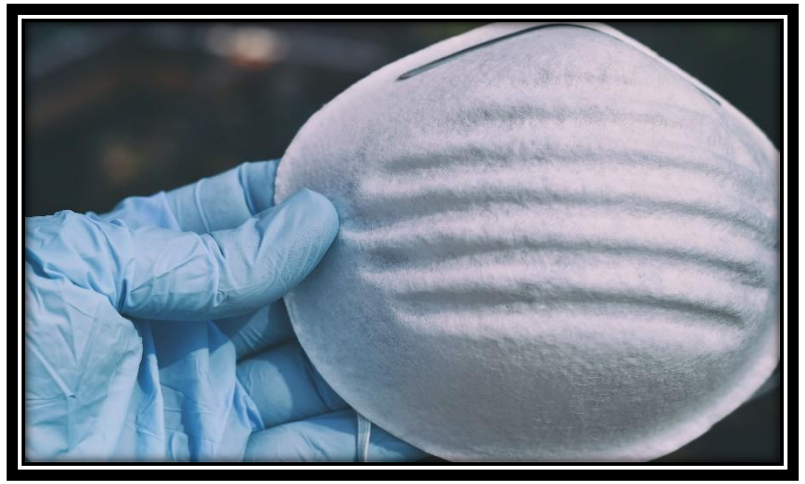

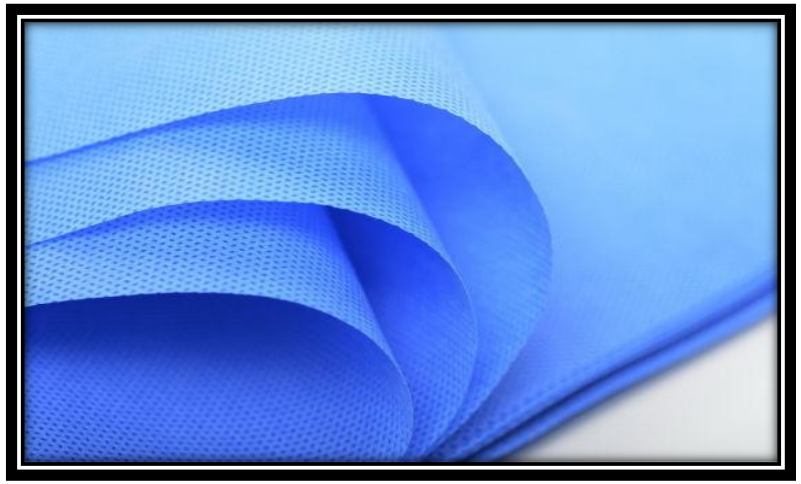

Spun Bond Fabrics

Melt Blown Fabrics

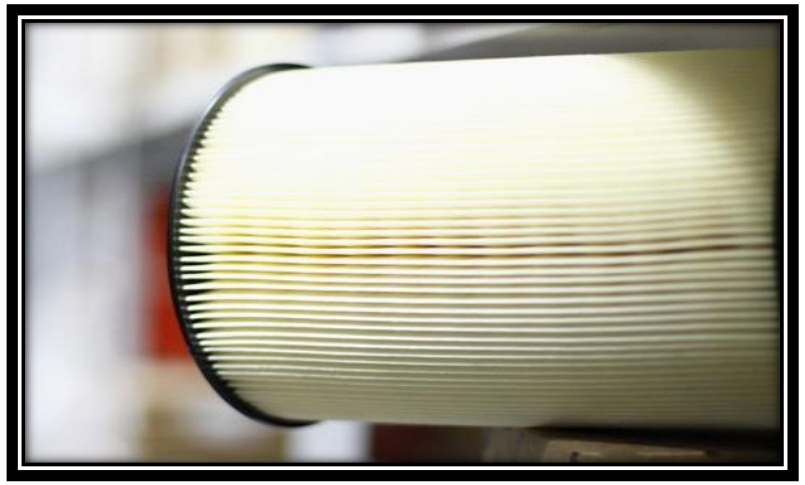

Inside The Things You See & Use Every Day

Spun Bond Fabrics Usages

FIBERWEB (INDIA) LTD

These are produced by depositing extruded, spun filaments onto a collecting belt in a uniform random manner followed by bonding the fibers. The fibers are separated during the web laying process by air jets or electrostatic charges

Industrial applications

- Hospital Masks
- Industrial Garments

Automotive

- Bumper Covers
- Interior Carpets
- Trunk Carpets
- Underbody Panels

Agricultural Applications

- Crop Cover
- Soil Cover
- Weed Protection

Textile Applications

- Curtains
- Luggage & Garments Covers
- Bedsheets & Pillow Covers

Personal Hygiene Applications

- Baby Diapers
- Adult Incontinence
- Sanitary Napkins

Technical Application

- Geotextiles
- Structural Engineering

Melt Blown Fabrics Usages

FIBERWEB (INDIA) LTD

The Flat Bond Nonwoven is one type of Spun Bond Nonwoven Flat bond nonwoven fabric is not sensitive to most of acids and chemicals (excluding alkalies) and allows high permeability to air and liquid.

Medical Fabrics

- Face Masks
- Disposable Gowns
- Drapes
- Sterilization Wraps

Adsorbents

- Oil-only pillow
- Spill Kits
- Floor Drying
- Bonded MB Pads & Rolls
- Track Mat

Wipes

- Face Wipes
- Hand Wipes
- Surface Cleaning (Wood, Leather, Floors, Tiles etc).

Filtration

- Surgical Face Masks
- Liquid Filtration
- Gas Filtration,
- Cartridge Filters
- Clean Room Filters

Sanitary Products

- Baby Diapers
- Adult Incontinence
- Sanitary Napkins

Apparel

- Disposable Industrial Apparel
- Thermal Insulation
- Substrates For Synthetic Leather

Why Non Wovens?

1. Removes wide range of contaminants from water (i.e. bacteria, viruses, metals, minerals etc.)
2. High level of flow capacity & High tensile strength. Excellent abrasion resistance & Flame retardant
3. Frost, Weed control and insect protection, Protection allows plants and crops to grow without use of pesticides and herbicides, protects crops against harmful UV rays
4. Sufficient strength and extensibility to withstand high-speed converting processes; a balance of softness and rigidity to accommodate both packaging and the intended use; fluid transport; absorption, containment & repellences; porosity; and density.
5. Exceptional permeability, Tear and puncture-resistance & Absorption of fats and oils High retention capacities & high air permeability
6. Apertures between intersecting fibers of nonwoven sheets - big enough to allow air and water to reach crop but small enough to keep out insects

Advantage Of Non Woven Fabrics

Removes wide range of contaminants from water (i.e. bacteria, viruses, metals, minerals etc.)

High level of flow capacity & High tensile strength. Excellent abrasion resistance & Flame retardant

Sufficient strength and extensibility to withstand high-speed converting processes.
A balance of softness and rigidity to accommodate both packaging and the intended use like Fluid Transport, Absorption, Containment & Repellences, Porosity & Density.

Exceptional permeability, Tear and puncture-resistance & Absorption of fats and oils High retention capacities & high air permeability

Apertures between intersecting fibers of nonwoven sheets - big enough to allow air and water to reach crop but small enough to keep out insects

Frost, Weed control and insect protection, Protection allows plants and crops to grow without use of pesticides and herbicides, protects crops against harmful UV rays

FIBERWEB (INDIA) LTD

Management Overview

Core Management Team

FIBERWEB (INDIA) LTD

Mr. Pravin Sheth

- CA by profession, with over 5 decades of industry experience, Responsible for driving the vision and strategy for Company

Mr. Bhavesh Sheth

- Responsible for business development, business process and organization strategy
- Total Experience – 30 years (10 yrs with Fiber web). Earlier worked with Fortune 500 Companies in USA as Senior Management

Mr. G Ravindran

- B. Tech (Chem Engg), M.Tech (Ind. Management) – IIT, Kharagpur Responsible for manufacturing facility in Daman Total experience – 40 years, 30 years with Company

Mr. Mukesh Pandya

- Qualified FCA, DISA & CISA with more than 30 years experience in accounts, auditing & Taxation.
- He is the Chief Financial Officer of Fiberweb India Ltd (4 years with the Company).

FIBERWEB (INDIA) LTD

Industry Overview

Global Nonwovens Market Outlook

The market is expected to surge at a CAGR of 4.6% during the forecast period 2024 to 2034.

Global Nonwovens Market

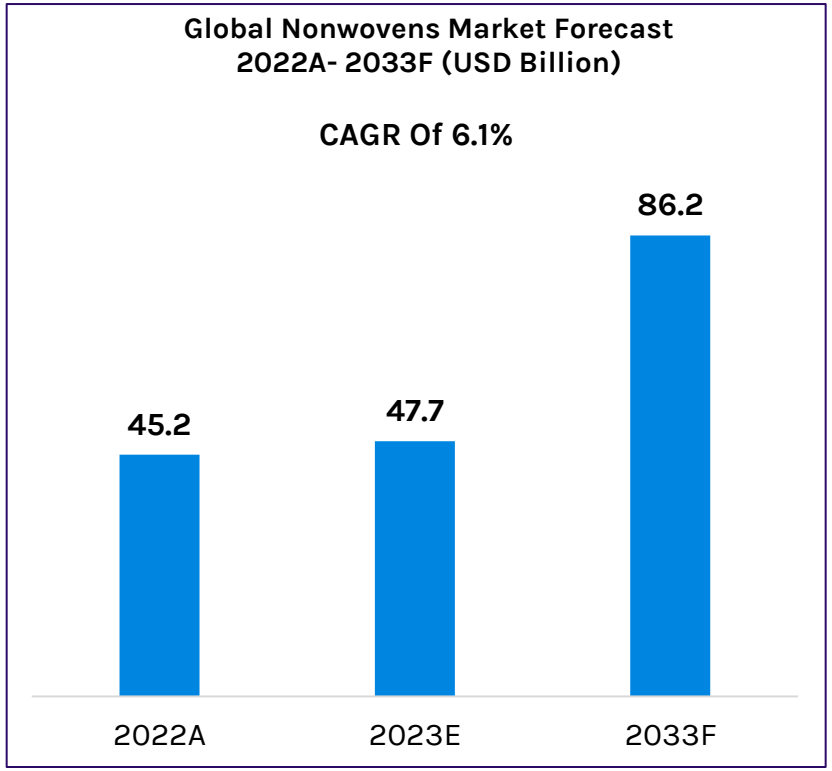

The Nonwoven market is likely to reach US$ 70.7 billion by 2034.

It is projected that the industry will expand more swiftly than in the past, with the growing demand for products related to personal care across the globe.

The market is anticipated to grow at a CAGR of 6.1% over the anticipated period.

Detailed assessment on the global nonwovens market conducted by Persistence Market Research points towards expansion at around 6.1% CAGR from 2023 to 2033.

Non-woven fabric is used to make various products in the healthcare industry, such as surgical gowns, aprons, drapes, face mask components, and wound dressings. They are also used in hygiene products, such as sanitary towels, sanitary napkins, tampons, baby diapers, and napkin liners. Source:

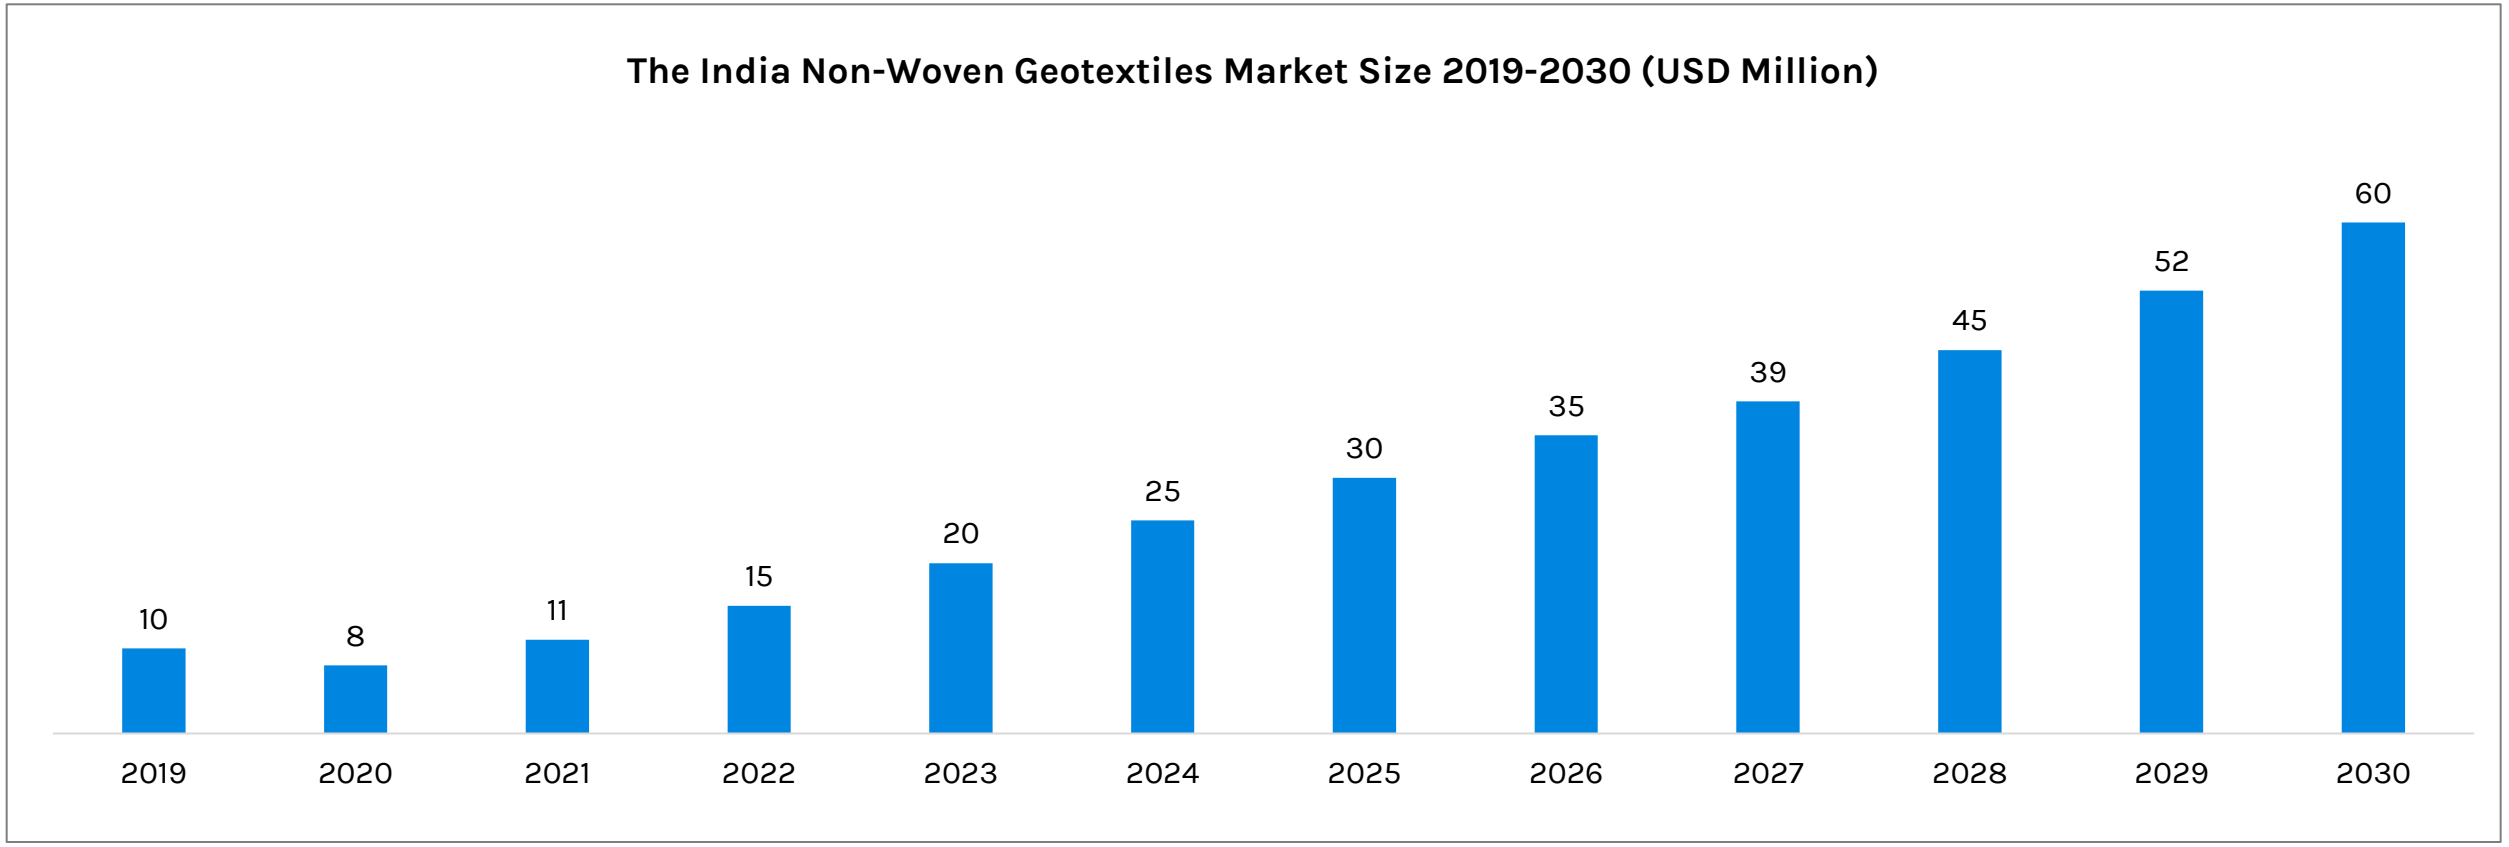

The global nonwoven fabrics market size is projected to grow from USD 40.5 billion in 2020 to USD 53.5 billion by 2025, at a CAGR of 5.7% from 2020 to 2025.

The market is fragmented, comprising several large and small players; the top six players accounted for over 22% of the global market. The market is extremely competitive, with various leading manufacturers engaging in strategic partnerships to expand their market share.

Evolving Landscape Of India's Non-Woven Geotextiles Market

The non woven fabric market in India is poised to expand at a CAGR of 6.4% through 2034 & is projected to grow to USD 460.73 million by 2030,

Source: fortunebusinessinsights

Nonwoven Key Industry Trends

1. Increasing use in Hygiene, medical, construction, and filtration applications would be key reasons for the growth of the nonwoven fabrics market
2. The key growth drivers of the nonwoven fabrics market are the growth of the modern healthcare sector in the emerging markets, rise in birth rate, and increase in the geriatric population in the western countries. The usage of non-woven fabric in medical applications is increasing.
3. These products are comparatively less expensive and normally used as disposable and reusable surgical gowns, drapes, gloves and instrument wraps.
4. Nonwoven is also cheaper due to the cheaper raw material costs. In nonwoven fabrics, over 80% of raw material fibers are synthetic. Polyester and cotton, some of its raw materials, are also available in large quantities and at affordable prices as compared to carbon fibers, glass fibers or high tenacity yarns and aramids which are costlier as well as have scare sources.
5. The production speed for making staple fiber nonwoven fabrics is much faster (100 to 400 yards per minute) than woven fabrics (0.5 to 6 yards per minute) and knit fabrics (2 to 16 yards per minute). Because of the higher speeds and reduction of steps, the production cost of nonwoven fabrics is very less.
6. In the wake of pandemic the demand for nonwovens have increased as result of this every major player is increasing capacity for nonwovens

Investment Rationale

Market Leadership & Niche Expertise

Positioned as a leader in the non-woven fabric industry, Fiberweb India Limited combines technical expertise with a strong market presence, catering to diverse sectors including hygiene, medical, and agriculture.

Strategic Capacity Expansion

Ongoing investments in advanced manufacturing facilities and capacity enhancement drive robust scalability, enabling the company to meet growing global demand efficiently and competitively.

Diverse Applications

The company's products cater to a wide range of industries, including hygiene, medical, automotive, and construction. This diversification mitigates risks and ensures steady revenue streams, enhancing overall stability.

Experienced Leadership & Visionary Management

Led by an experienced and visionary management team, the company benefits from strategic foresight and a focus on operational excellence, positioning the company for consistent long-term growth.

Financial Performance & Ratios

The Company demonstrated strong operational resilience, with EBITDA margins improving from 14.23% in FY24 to 21.85% in FY26, driven by operational efficiencies, cost optimization, and disciplined working capital management.
