

Rating Update

September 04, 2026 | Mumbai

Chembond Material Technologies Limited**Update as on September 04, 2026**

This update is provided in continuation of the rating rational below.

The key rating sensitivity factors for the rating include:

Upward Factors:

- Steady growth in revenues and improvement in operating margin leading to net cash accruals above Rs 20 crores.
- Sustenance of financial risk profile

Downward Factors:

- Lower than expected growth in revenue or operating margins remain below 5% resulting in lower-than-expected net cash accruals.
- Increase in working capital requirements, larger-than-expected, debt-funded capital expenditure (capex) or acquisition or dividend payout, weakening the financial risk profile.

Crisil Ratings has a policy of keeping its accepted ratings under constant and ongoing monitoring and review. Accordingly, Crisil Ratings seeks regular updates from companies on the business and financial performance. Crisil Ratings is, however, awaiting adequate information from Chembond Material Technologies Limited (CMTL; Formerly known as Chembond Material Technologies Limited) which will enable us to carry out the rating review. Crisil Ratings will continue provide updates on relevant developments from time to time on this credit.

Crisil Ratings also identifies information availability risk as a key credit factor in the rating assessment as outlined in its criteria 'Information Availability Risk in Credit Ratings'.

About the Group

Set up in 1975 by Dr Vinod Shah, Chembond manufactures speciality chemicals and provides a range of products for diverse industrial applications. It offers metal-treatment chemicals, , and industrial enzymes and animal health products through its subsidiary.

Recently the group has changed its group structure wherein Construction Chemical and Water Chemical business of CMTL (earlier known as Chembond Chemicals Limited) and Chembond Clean Water Technologies Limited (CCWTL) has been amalgamated with Chembond Chemical Specialties Limited (CCSL) while Chembond Water Technologies Limited (CWTL), Chembond Water Technologies (Malaysia) Sdn. Bhd. (step-down subsidiary), Chembond Water Technologies (Thailand) Co. Ltd (Step-down Subsidiary), Chembond-Calvatis Industrial Hygiene Systems Limited and Chembond Distribution Limited has become subsidiaries / step down subsidiaries of Chembond Chemical Specialties Limited.

Additionally, Chembond Material Technologies Private Limited, Phiroze Sethna Private Limited, Gramos Chemicals India Private Limited has been amalgamated with Chembond Material Technologies Limited. Chembond Bioscience Limited continues to be a wholly owned subsidiary of Chembond Material Technologies Limited.

Please note: This advisory should not be construed as a rating reaffirmation.

About Crisil Ratings Limited (A subsidiary of Crisil Limited, an S&P Global Company)

Crisil Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

Crisil Ratings Limited ('Crisil Ratings') is a wholly-owned subsidiary of Crisil Limited ('Crisil'). Crisil Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").

Please note: This advisory should not be construed as a rating reaffirmation.

Crisil Ratings uses the prefix 'PP-MLD' for the ratings of principal-protected market-linked debentures (PPMLD) with effect from November 1, 2011, to comply with the SEBI circular, "Guidelines for Issue and Listing of Structured Products/Market Linked Debentures". The revision in rating symbols for PPMLDs should not be construed as a change in the rating of the subject instrument. For details on Crisil Ratings' use of 'PP-MLD' please refer to the notes to Rating scale for Debt Instruments and Structured Finance Instruments at the following link: <https://www.crisilratings.com/en/home/our-business/ratings/credit-ratings-scale.html>

Rating Rationale

July 01, 2025 | Mumbai

Chembond Material Technologies Limited

Ratings downgraded to 'Crisil BBB/Stable/Crisil A3+'; Removed from 'Watch Negative'

Rating Action

Total Bank Loan Facilities Rated	Rs.12 Crore
Long Term Rating	Crisil BBB/Stable (Downgraded from 'Crisil BBB+'; Removed from 'Rating Watch with Negative Implications')
Short Term Rating	Crisil A3+ (Downgraded from 'Crisil A2'; Removed from 'Rating Watch with Negative Implications')

Note: None of the Directors on Crisil Ratings Limited's Board are members of rating committee and thus do not participate in discussion or assignment of any ratings. The Board of Directors also does not discuss any ratings at its meetings.

1 crore = 10 million

Refer to Annexure for Details of Instruments & Bank Facilities

Detailed Rationale

Crisil Ratings has downgraded its ratings on the bank facilities of Chembond Material Technologies Limited (CMTL; Formerly known as Chembond Material Technologies Limited) to '**Crisil BBB/Crisil A3+**' from '**Crisil BBB+/Crisil A2**' and removed its ratings from '**Rating Watch with Negative Implications**' while assigned a '**Stable**' outlook to its long term rating.

The downgrade in the ratings reflects the weakening of the business risk profile of Chembond Material Technologies Limited (earlier known as Chembond Chemicals Limited, CCL) on account of demerger of Water technologies and Construction chemical business from the group. With this effect, the scale of operations from continuing business stood at around Rs 201 crores in fiscal 2025 as compared to Rs 462 Crores in fiscal 2024 on a consolidated level (Rs 178 crores as per restated financials of fiscal 2024). While the operating profitability from continuing business improved in fiscal 2025 to 6.75% from 3.5% in fiscal 2024, the absolute EBITDA has been impacted because of the reduced scale of operations. The financial risk profile remains comfortable despite moderation in net worth due to business split given limited dependence on external borrowing leading to healthy capital structure. Liquidity profile also continues to remain adequate with healthy cash accruals against nil repayments and moderate utilization of fund base bank limits.

The rating reflects the extensive promoter experience in the chemical industry leading to a established market position of the group along with its comfortable financial risk profile. These strengths are partially offset by the moderate working capital cycle and moderate scale of operations.

Analytical Approach

For arriving at its ratings, Crisil Ratings has combined the business and financial risk profiles of Chembond with those of its wholly owned subsidiary Chembond Bioscience Limited. This is because these entities, together referred to as the Chembond group, are owned and managed by the same promoters and have significant operational and financial linkages.

Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation

Key Rating Drivers & Detailed Description

Strengths:

Extensive promoter experience in the chemical industry: The promoter of the company has more than 4 decades experience in the chemical industry which has helped them understand the business and industry dynamics and has helped overcome business challenges over the years. Backed by the promoter's experience, the company has developed a healthy relationship with its key suppliers and customers over the years. Chembond group over the years had established a good market position in Water treatment chemicals, construction chemicals, Industrial coatings and adhesives and animal health segment along with diversified clientele spanning across various industries such as automobile, petrochemicals, steel, fertilizers, construction amongst the others. However, with the recent change in the group structure CMTL's continuing business will have Metal treatment and animal health business only with other segments being transferred to a different entity under the same promoter group leading to an impact on the overall scale of operations of CMTL. While the business risk profile of the group has been impacted by this effect, it remains supported by the extensive promoter experience backed

by professional management, and its healthy relationship with suppliers and clientele. This should help with the steady growth in the scale of operations from the continuing business.

Comfortable financial risk profile: Financial risk profile of the group remains comfortable, although the net worth has been impacted on account of demerger of the water technologies and construction chemical business as a result the net worth as on March 31, 2025, stood at Rs 156 crores. Limited reliance on the outside debt has kept the capital structure at comfortable levels yielding gearing and total outside liability to adjusted net worth ratio below 1 time as on March 31, 2025, which is expected to remain in the similar range over medium term in absence of any large debt funded capex plans. The debt protection measures also remain at comfortable levels on account of moderate interest expenditure and operating profitability yielding interest cover of over 10 times in fiscal 2025 which is expected to remain at comfortable levels over the medium term. The overall financial risk profile of the group is expected to remain healthy over the medium term, backed by the expected improvement in the scale of operations and steady accretion to the reserves.

Weaknesses:

Moderate working capital cycle: The operations of the group remain moderately capital intensive with gross current assets of 132 days as on March 31, 2025. This is on account of debtors of 72 days as the group offers moderate credit to the customers. Inventory on average remains around 30 to 40 days as per the business requirements. Overall working capital cycle remains supported by the credit received from suppliers of around 60 to 90 days. With no change in the credit offered and inventory holding policy, the working capital cycle is expected to remain moderately capital intensive over the medium term with gross current assets ranging around 140 to 150 days over medium term.

Moderate scale of operations and intense competition in the chemical industry: With the change in the group structure where in the water technologies and construction chemical business has been carved out of the continuing operations, the scale of the group has reduced which is evident in the revenues of Rs 201 crores in fiscal 2025 as compared to Rs 462 Crores in fiscal 2024 on a consolidated level (Rs 178 crores as per restated financials of fiscal 2024). The continuing operations has seen a growth in revenues of 13% year on year largely on account of the steady order flow from the customer however the overall scale remains moderate. With intense competition in the chemical industry given that it is fragmented because of low entry barriers such as limited capital and technology requirements, small gestation period and easy availability of raw materials, the group remains exposed to the same and hence can impact the growth and profitability. The operating margins of the group on the continuing business although improved to 6.75% in fiscal 2025 from 3.5% in fiscal 2024 on account of the absorption of costs at higher base, the steady growth in the revenues while improving its operating profitability will be a key monitorable.

Liquidity: Adequate

Bank limit utilisation is less than 10 percent for the past twelve months ended January 2025. Cash accruals are expected to be over Rs 15 crore against nil term debt obligations in fiscal 2026 and 2027. Current ratio is healthy at over 2 times on March 31, 2025. Cash and cash equivalents stood at Rs 13.60 crores which is entirely free and supports the overall liquidity. Additionally, the group has no major capex plans over medium term.

Outlook: Stable

Crisil Ratings believes that Chembond group will benefit from its extensive promoter experience, its healthy relationship with customers and suppliers along with its comfortable financial risk profile.

Rating Sensitivity Factors

Upward Factors:

- Steady growth in revenues and improvement in operating margin leading to net cash accruals above Rs 20 crores.
- Sustenance of financial risk profile

Downward Factors:

- Lower than expected growth in revenue or operating margins remain below 5% resulting in lower-than-expected net cash accruals.
- Increase in working capital requirements, larger-than-expected, debt-funded capital expenditure (capex) or acquisition or dividend payout, weakening the financial risk profile.

About the Group

Set up in 1975 by Dr Vinod Shah, Chembond manufactures speciality chemicals and provides a range of products for diverse industrial applications. It offers metal-treatment chemicals, , and industrial enzymes and animal health products through its subsidiary.

Recently the group has changed its group structure wherein Construction Chemical and Water Chemical business of CMTL (earlier known as Chembond Chemicals Limited) and Chembond Clean Water Technologies Limited (CCWTL) has been amalgamated with Chembond Chemical Specialties Limited (CCSL) while Chembond Water Technologies Limited (CWTL), Chembond Water Technologies (Malaysia) Sdn. Bhd. (step-down subsidiary), Chembond Water Technologies (Thailand) Co. Ltd (Step-down Subsidiary), Chembond-Calvatis Industrial Hygiene Systems Limited and Chembond Distribution Limited has become subsidiaries / step down subsidiaries of Chembond Chemical Specialties Limited.

Additionally, Chembond Material Technologies Private Limited, Phiroze Sethna Private Limited, Gramos Chemicals India Private Limited has been amalgamated with Chembond Material Technologies Limited. Chembond Bioscience Limited continues to be a wholly owned subsidiary of Chembond Material Technologies Limited.
