1 crore = 10 million

Refer to Annexure for Details of Instruments & Bank Facilities

Detailed Rationale

CRISIL Ratings has upgraded its ratings on bank loan facilities of Euro Panel Products Limited (EPPL) to '**CRISIL BBB/Stable/CRISIL A3+**' from '**CRISIL BBB-/Positive/CRISIL A3**'.

The upgrade in rating reflects sustained improvement in the business risk profile while maintaining its financial risk profile. The company has reported a year-on-year jump of 20% in revenue on the back of healthy demand resulting in higher volume sales. The company achieved scale of Rs 395 crores for fiscal 2024 compared to Rs 329 crores for fiscal 2023. The company is expected to maintain its volume growth over the medium term on back of capacity addition to meet healthy demand. While operating margins were improved in fiscal 2024, they are expected to improve further as capex for backward integration is completed. It will remain monitorable over the medium term.

Higher Accretion to reserves has led to an improvement in financial risk profile of the company. The company's net worth has been Rs 114 crores as on March 31, 2024 and is expected to improve further. Despite the debt funded capex, financial risk profile remains comfortable. Any further debt funded capex will remain monitorable.

The rating continues to reflect the manufacturing from its established brand "Eurobond" and promoters' extensive experience in manufacturing of the Aluminum Composite Panels (ACP). Rating also factors in moderate financial risk profile. These strengths are partially offset by susceptibility of revenues and operating margins to infrastructural demand and large working capital requirement.

Key Rating Drivers & Detailed Description

Strengths:

- **Strong market presence:** The company has been into manufacturing of ACPs since 2013 and has been strengthening its presence through more than 100+ distributors, 14 depots and more than 5000 retail touchpoints spread across country. Promoters have experience of over 2 decades in the ACP sheet business and have established relationships with suppliers and customers. The promoters have developed a strong understanding of the industry dynamics, which has helped them successfully navigate several business cycles as well as build long-standing relationships with customers. The company also exports to countries such as Sri Lanka, Qatar, USA, etc. This strong presence has led to improvement in the scale of operations to Rs 395 crore for fiscal 2024. Backed by continuous capital expenditure done by the company to enhance capacities and expansion in product portfolio, should support the business risk profile of the company.
- **Moderate Financial risk profile:** The financial risk profile is marked by network of Rs 114.8 crore and comfortable gearing of 0.76 times and total outside liabilities to adjusted network (TOLANW) of 1.45 times as on March 31, 2024. Debt protection metrics were average, with interest coverage and net cash accrual to adjusted debt ratios of 3.53 times and 0.22 time, respectively, in fiscal 2024. CRISIL Rating believes that the financial risk profile is expected to remain comfortable despite the debt funded capex to be done by the company over medium term.

Weaknesses:

- **Susceptibility of revenues and operating margins to infrastructural demand:** EPPL's products and services have wide applications at metro stations, airports, ports, hospitals, etc. Cyclicalities in the infrastructure space affects the level of activity and sales of the company. This can be seen for fluctuating operating margins. Operating margins have been in the range of 7.7%-12.6% over the last 5 years ended fiscal 2024. Operating margins have improved in fiscal 2024 to 8.6%. Company has been reducing dependence on China by procuring locally and backward integration thus expected improvement in margins in the medium term and will remain key rating sensitivity.
- **Large working capital requirement:** Gross current assets (GCA) were 200 days as on March 31, 2024 (against 200 days a year ago), driven by receivables of 37 days and inventory of 159 days. The working capital cycle was partly supported by payables estimated at 78 days as on March 31, 2024. GCA days are expected to be in the same range over the medium term.

Liquidity: Adequate

Liquidity is adequate marked by net cash accruals of Rs 19.14 crores against repayment obligations of Rs 4.9 crores for fiscal 2024. Going forward net cash accruals are expected to be over Rs 23 crores against repayment obligations of Rs 5-7 crores over the medium term. Bank Limit Utilization is 81.3% utilized for the last 12 months ending March 2024. Company has cash and cash equivalents (Encumbered and unencumbered) of Rs 4.7 crores as on March 31, 2024.

Outlook: Stable

CRISIL Ratings believes EPPL will maintain its business risk profile over medium term with volume growth backed by established brand and promoters' extensive experience.
