Industry Trends

Domestic

- India's consumption remained steady, supported by resilient FMCG volume growth.
- Packaging Films demand improved sequentially despite softness in April, as converters and brand owners gradually resumed purchases after deferring orders amid elevated prices in March and early April due to the West Asia crisis.
- West Asia conflict is disrupting packaging film raw material production and transit routes, driving up freight costs. In this backdrop, India's meaningful import dependence on MEG, Homo Polypropylene and other key feedstocks further tightens supply and elevates prices.
- Aseptic Packaging demand softened amid increased duty-free imports at aggressive prices in the domestic market, while overseas volumes were impacted by supply disruptions and delayed consignment deliveries due to the West Asia crisis.

International

- Strong Americas Packaging Films demand, supported by the US Government's push for domestic production and onshoring amid evolving trade policies; constrained imports from West Asia and India are expected to sustain the positive volume growth outlook.
- Europe witnessed stable sales volumes amid continued pressure from low-priced imports, with demand expected to moderate next quarter due to seasonal holiday.
- CIS BOPET Films sales benefited from steady demand, while CPP volumes were impacted by increased low-priced imports.
- Demand for BOPET and BOPP Film surged across MEA, driven by strong local and regional sourcing as customers de-risked supply chains amid the West Asia crisis; Egypt led the growth, while Nigeria benefited from robust export opportunities and improving domestic demand.
